

Please build my portfolio to closely match the visual style and layout of the demo I shared.

The overall look should be premium corporate, executive, clean and modern, suitable for PMO, banking, Big 4 and FTSE 100 applications.

Main navigation

Use these tabs:

Home | Expertise | Case Studies | PMO Evidence | Experience | Qualifications

Keep the navigation minimal and clean, with Nhat Dinh / ND on the left and the menu on the right.

Colour palette

Please use:

- Primary Navy: #0B1F33
- Accent Teal: #0F766E
- Secondary Blue: #315F8C
- Warm Off-White Background: #F7F6F2
- Soft Slate Sections: #EEF2F4
- Text Grey: #5B6573

Use navy for headings, teal for highlights, active tabs, icons and key metrics, blue for secondary links, and off-white/light slate for page backgrounds and cards.

The website should feel refined and high-end, not plain white and grey.

Typography

Use Inter as the main font.

Headings should be bold, large and clean.

Body text should be easy to scan, with generous spacing.

Home page

The Home page should follow the same composition as the demo.

On the left side:

- PMO / Portfolio Governance / Transformation label

- Main headline
- Short introduction
- CTA buttons

On the right side:

- My professional suit photo 1
- A KPI panel beside or partially overlapping the photo 1

Please use my uploaded suit photo 1, but replace the current plain beige background with a bright, premium corporate-office background similar to the demo:

- soft-focus modern office
- large windows
- subtle city skyline
- light neutral tones
- very clean and professional
- do not alter my face, hairstyle, outfit or appearance

The photo 1 should blend naturally into the website rather than looking like a rectangular passport photo 1.

Below the hero, show a strong KPI strip with metrics such as:

150+ | €5–10M | 33% → 100% | 80% | 90% | 6 squads

Then show preview sections for:

- Expertise
- Featured Case Studies
- About
- Contact

Expertise page

Use a clean grid/card layout similar to the demo.

Each expertise area should have:

- small teal icon
- title
- concise explanation
- applied experience or metric where relevant

Keep the page visually structured and avoid long walls of text.

Case Studies page

Use large professional cards.

Each case should clearly show:

- company
- case study title
- short context
- key metrics
- CTA to open the full case study

Full case studies should follow:

Context → Challenge → My Contribution → Key Actions → Outcomes

Metrics should be large and visually prominent.

PMO Evidence page

This should be the most visual page after Home.

Show recreated PMO artefacts in a professional gallery:

- Executive Portfolio Dashboard
- RAID & Dependency Register
- Integrated Portfolio Plan
- Portfolio Financial View
- Governance Calendar
- Executive Steering Pack

Each artefact should look like a real enterprise PMO document/dashboard.

Use navy, teal and restrained RAG colours.

Clearly label the artefacts as anonymised/recreated examples.

Experience page

Use the same layout as the demo:

Left column: vertical career timeline

Middle column: selected role details, responsibilities and achievements

Right column: optional supporting visual or link to Qualifications

Do not repeat Education and Certifications in full here if they have their own Qualifications page.

The main focus should remain on career experience and measurable impact.

Qualifications page

Create a separate page for:

Education

- MSc Business Administration
- Bachelor of Economics

Use my graduation photo 2 prominently in the MSc section.

Do not heavily edit this graduation photo 2. Keep the original university setting and make it look elegant within the page.

Professional Certifications

Display certifications in clean credential cards 3, 4, 5, 6 with:

- certificate thumbnail
- qualification name
- issuer
- year

Clicking the thumbnail should open a larger version.

Languages

Show languages in a simple professional format.

Contact section

The same Contact section should appear at the bottom of every page.

Include:

- Email
- LinkedIn
- Location
- Open to London opportunities

Do not use a separate Contact tab.

Overall design direction

The website should feel like:

Institutional banking + Big 4 consulting + FTSE 100 annual report + modern enterprise technology

Avoid:

- strong gradients
- neon colours
- glassmorphism
- excessive animation
- stock photography
- skill percentage bars
- huge certification logos
- overly creative layouts

Use:

- generous whitespace
- subtle borders
- clean cards
- restrained shadows
- teal accents
- navy headings
- executive-style data visuals

The final result should feel:

Credible · Premium · Structured · Modern · Data-driven · Executive-ready
