

Please apply the following updates across the entire portfolio website.

1. Global navigation / tab header

Use a full Primary Navy background #0B1F33 for the navigation bar on every page.

Use white/off-white text for inactive tabs and Accent Teal #0F766E for the active tab, hover state and underline.

The navigation must be identical on every page:

Home | Expertise | Case Studies | PMO Evidence | Experience | Qualifications | Contact Me

The ND / NHAT DINH branding should also use white/off-white on the navy background.

2. Contact section

The Contact section at the bottom of every page currently looks too pale. Change the entire Contact section to Primary Navy #0B1F33.

Use:

- Teal #0F766E for the small CONTACT label, icons, dividers and accents
- White/off-white for the main heading
- Light grey/off-white for supporting text

The Contact section must look consistent with the top navigation and feel like a strong closing section.

3. Contact Me

Replace the current CV button in the top-right corner with:

Contact Me

Clicking it should scroll to the Contact section at the bottom of the current page.

Use this Contact content:

Open to London opportunities.

I am open to PMO, Portfolio Governance, Programme Governance, Business Operations and Transformation opportunities in London.

Email: dtmnhat.uk@gmail.com

LinkedIn: /in/dtmnhat

Location: Netherlands

Relocation: Open to London

Buttons:

LinkedIn

Email

4. Remove CV completely
Remove all occurrences of:
 - Download CV
 - CV
 - CV icons
 - CV links
 - /cv navigation

This must be removed from the header, Home page, Contact sections, footer and mobile navigation.

I use a customised CV for each employer, so there should be no generic CV available on the portfolio.

5. Change €5–10M to €5M+
Replace every occurrence of:

€5–10M

with:

€5M+

across the entire website.

Where relevant, use wording such as:

€5M+ Portfolio Funding Visibility

Please update this on:

- Home
 - Expertise
 - Case Studies
 - PMO Evidence
 - Experience
 - KPI cards
 - case-study detail pages
 - mobile layouts
6. Footer navigation

Update the footer navigation on every page to exactly:

Home | Expertise | Case Studies | PMO Evidence | Experience | Qualifications

Remove CV completely.

7. Qualifications page
Remove the Toolkit / Technology / Tools section from Qualifications because this information already exists under Expertise.

Qualifications should contain only:

- Education
 - Professional Certifications
 - Languages
8. Qualifications headline

Change:

Education and professional certification behind the delivery record.

to:

Education and professional qualifications behind the delivery record.

9. Typography

Use Inter throughout the entire website.

Increase the overall font size by approximately one level because the current text feels too small.

Use a maximum of three main font sizes per page:

Large — page titles / hero titles

Medium — section headings / card headings

Body — normal text / metadata / labels

Suggested desktop sizes:

Large: 48–52px

Medium: 28–32px

Body: 18px

Do not create many slightly different font sizes.

Use font weight, colour, spacing and uppercase labels to create hierarchy instead.

Suggested weights:

Large: 700

Medium: 600–700

Body: 400–500

The same hierarchy must be used consistently across Home, Expertise, Case Studies, PMO Evidence, Experience and Qualifications.

10. Colour palette

Use this palette consistently:

Primary Navy: #0B1F33

Accent Teal: #0F766E

Secondary Blue: #315F8C

Warm Off-White: #F7F6F2

Soft Slate: #EEF2F4

Text Grey: #5B6573

On navy backgrounds:

- Main text = white/off-white
- Labels/icons/highlights = teal
- Secondary text = light slate

On light backgrounds:

- Headings = navy
- Body text = grey
- Labels/icons/links = teal

11. Section styling

Section labels such as:

PORTFOLIO SCALE

EXPERTISE

CASE STUDIES

PMO EVIDENCE

EXPERIENCE

QUALIFICATIONS

CONTACT

should all follow the same visual language.

Use teal uppercase text and consistent spacing.

12. Cards and KPI blocks

Keep cards clean and corporate.

Use:

- white/off-white background
- subtle border
- minimal shadow
- navy headings
- teal icons and accents

Avoid:

- gradients
- glassmorphism
- neon colours
- strong shadows
- unnecessary decorative elements

13. Contact consistency

The Contact section must be the same reusable component on every page.

Every page should end with:

Page Content

Navy Contact Section

Global Footer

14. Responsive design

Please apply all of these changes to both desktop and mobile versions.

Make sure mobile navigation also includes:

Home

Expertise

Case Studies

PMO Evidence

Experience

Qualifications

Contact Me

and does not contain any CV link.

Final visual direction:

The portfolio should feel:

Premium

Corporate

Executive

Banking / Big 4 appropriate

Modern

Data-driven

Consistent

Professional

The key visual goal is stronger contrast and more confidence through the Navy + Teal combination, while keeping the website clean and understated.
